

SHEETCUT HL

LASER FIBER PLATFORM CUTTING MACHINE FOR METAL SHEET

ACCURATE
Specially designed to cut thin sheet.

COMPACT
All components inside the machine (without peripherals).

EFFICIENT
It employs the latest laser technology for the best finish.

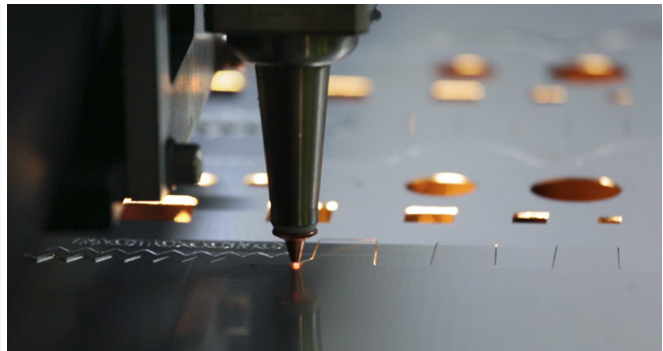

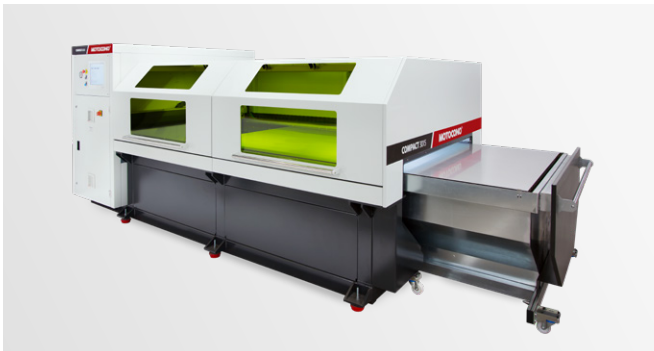

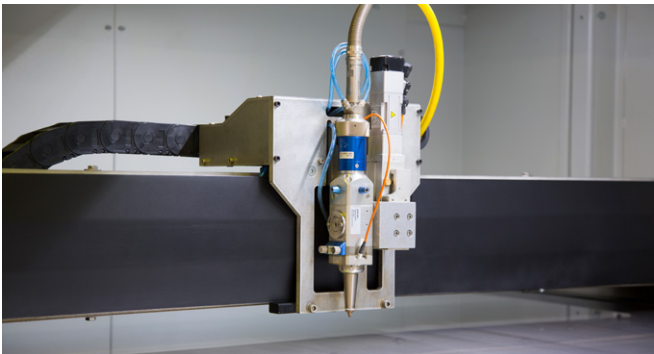

COST-EFFECTIVE
It nests multiple pieces automatically for the maximum profit of material (nesting)

MOTOCONO®

TECHNICAL FEATURES:

Profitable cutting area: 3000 x 1500 mm	Cutting technology: Laser fiber generator up to 1.5 Kw
Maximum cutting thickness: Up to 6 mm	Motion: Lineal motors
Movement accuracy: 0.02 mm/m	Material: Carbon steel, galvanized, stainless steel and aluminum
Power supply: 400V, 3-phase to 50/60 Hz	Control panel: CNC with 15" touch screen
Size: 4000 x 2200 x 1800 mm	Control software: CutExpert by Eurosoft
Weight (approx.): 3000 Kg	

CONTACT:

Calle Fenolleda 8, Pol. Ind. Nord
 (+34) 937 354 597
 Terrassa 08226 – Barcelona, España

Our machines are produce according the European Union safety requirements.
